

Evolution Challenger Walker

Manufacturer:
Evolution

The Evolution Series, available in four sizes, are the strongest and one of the most stable walkers on the market today. Every Evolution model uses 1-1/8" cold rolled steel tubing, the same material used in mountain bike fabrication. Strong 1" tubing is used on the handles, every fastener is stainless steel or plated against corrosion and the frame is powder coated for UV protection against fading. All plastic components are molded utilizing the toughest plastics, capable of withstanding temperatures down to -40°C. The Evolution model offers unmatched stability for users suffering from neurological conditions such as Multiple Sclerosis and Parkinson's, in addition to arthritic and stroke conditions and users with wide gates. The stable steel frame and 400 lbs seating capacity make this walker ideal for bariatric users. The Evolution series also include the largest baskets available anywhere.

Evolution Challenger Walker

Evolution

FEATURES:

- The Evolution Series is the therapists choice for individuals of higher weight
- The Evolution has a weight bearing capability of up to 400lbs
