

Otto Bock Kimba Spring Tilt-in-Space Wheelchair

Manufacturer:
Otto Bock

In the Kimba Spring stroller, children are optimally positioned and supported. The many adjustment options and multi-function seating unit enable precise adaptation to the body proportions of the child as well as optimal supportive and corrective functions. Subsequent problems caused by incorrect posture are prevented. Not only can the seat depth and width as well as the height of the back rest and foot rest be adjusted to the millimeter; the pelvic, side limitation, and optional thorax and head support pads can also be adjusted.

Otto Bock Kimba Spring Tilt-in-Space Wheelchair

Otto Bock
